## Allowable Subject Matter

I. The following is an examiner's statement of reasons for allowance:

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kumar et al. disclose a technique for transmitting power control signals from a base station to a mobile, where the mobile uses those power control signals to control the transmit power level of its reverse-link channels.

Wallentin et al. disclose a technique of connection with a diversity handling moveover procedure for a cellular system having soft handover, allocation of a replacement diversity handling unit in a target node occurs only after a moveover decision has been made by a source node

Ejzak et al. disclose a systems and methods for supporting handover of wireless calls between wireless telecommunications systems or components thereof which support differing call models, including circuit and packet call models.

Foster et al. discloses an apparatus, method and system for mobile wireless communication hand-off utilizing directed call pick up with barge-in.

Pan et al. discloses a mobile communication system, and more particularly, to an apparatus and method for implementing bi-directional handovers between a cellular network and another wireless network without cellular network control intervention.

Andersson et al. disclose pertains to wireless telecommunications, and particularly to moveover or relocation of a serving radio network control node in a radio access network

Ohlsson et al. discloses pertains to data communications systems, and particularly to diversity handover (e.g., soft handover) in a telecommunications system such as a wideband code division multiple access telecommunications system.

Therefore, all of the above prior art fails to disclose exchange a modality handoff signal after transfering voice data over the original leg, wherein exchanging the modality handoff signal is performed over the original leg.

Claims 1-99 are allowed based on Kallio in view of Wilhoite et al.

## Conclusion

II. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sharad Rampuria whose telephone number is (571) 272-7870. The examiner can normally be reached on Mon-Fri. (8:15-4:45).

Application/Control Number: 10/086,673 Page 4
